

A Hearing Solution with 10 Years of Success!

With the Holiday Season upon us, gatherings with friends and family are at their peak. This is certainly a time of year where it is most obvious that your ability to hear is crucial. Even the slightest hearing loss has significant consequences. You pull away from group conversations as loved ones become mumblers, punch lines are missed and asking to repeat becomes a nuisance. Indeed, untreated or improperly treated hearing loss has a pronounced negative impact on your quality of life not to mention an effect on your safety, independence and cognitive abilities. Consulting the appropriate hearing healthcare provider, in the most independent setting, is crucial to ensure that you continue to enjoy an engaging, productive and rewarding life.

Rosanne McNamee, Doctor of Audiology, Registered Audiologist, is the owner of **Hearing Solutions Clinic** and is celebrating a decade of service this year! This 10 year success undoubtedly stems from the fact that Hearing Solutions Clinic offers a kind of hearing healthcare that is lacking in Ottawa. "I had concerns about the qualifications and motivations of many dispensing locations so I decided to open my own practice to preserve and protect patient-centered comprehensive hearing healthcare," explains Rosanne. At Hearing Solutions Clinic you won't be in a large retailer, hear an office jingle, find crowded waiting rooms, be lured by marketing schemes or feel the pressure of sales tactics. Instead, you will find yourself in a clinic with old fashion roots where the patient's hearing healthcare is the one and only priority, not hearing aid sales. It is large enough to offer amazing professional services and products, yet small enough to devote all the time necessary to allow for more personal professional relationships with uncompromised customized care. You will get top quality, integrity, and no shortcuts.

This personalized hearing healthcare approach differs drastically with that of retail settings, larger clinics and chains. Unfortunately, patients there are too often nameless, shuffled between staff, rushed through consultations, and offered a limited choice of hearing aid makes and models. At Hearing Solutions Clinic, the same Audiologist always takes her time to both answer all your questions

and listen to all your concerns. This is followed by the luxury of being able to choose from an unlimited range of the most up-to-date products. "It would not be in my patient's best interest for the clinic to only carry its exclusive brand, one line of products or even a few favored manufacturers like many larger centers do. Everyone has distinct hearing needs and so to find the right solution, selection is key. It is important to consider all the options across all of the manufacturers because their products vary greatly, from a variety of noise reduction systems to different telephone solutions, from waterproof or rechargeable hearing aids to Bluetooth capabilities. Moreover, hearing aids may not always be the best or only solution. We therefore also carry a wide variety of assistive listening devices," explains Rosanne. At Hearing Solutions Clinic, you have an active role in the hearing aid evaluation, thereby guaranteeing a hearing solution that is unique to *you, your* lifestyle and *your* hearing needs. By remaining independent, private, as well as locally owned and operated, Hearing Solutions Clinic has no manufacturer limitations and very competitive prices.

Rosanne further distinguishes herself from other clinics by solely hiring indi-

viduals that not only honor her traditional caring views but professionals that hold the highest level of education in the hearing healthcare field. There are no unregulated Hearing Instrument Specialists at Hearing Solutions Clinic, only Doctors of Audiology who are diligent at keeping the clinic up-to-date in technology and practice. Consequently, you receive the service of professionals who are not only top in their field, but who pride themselves on offering quality products and the highest standard of care. You will never worry whether or not you have chosen the best place to trust with your hearing needs.

So, if you believe in your right to the best, fullest and most customized service available, book your consultation with one of the Doctors of Audiology at **Hearing Solutions Clinic**, conveniently located at **1915 Baseline Rd, suite 202** (across from Home Depot). Parking is free! Home visits optional.
