

# Hearing Solutions Clinic Now In Manotick!

As the Holiday Season nears, thoughts of the upcoming celebrations emerge. Unfortunately, if you or your loved one suffers some degree of hearing loss, especially if untreated or improperly treated, friend and family gatherings can be thought of with less enthusiasm. Having to repeat and missing the punch lines leave you feeling disconnected. There is still enough time to get you or your loved one hearing better. Consulting the appropriate hearing healthcare provider, in the most independent setting, is crucial.

Rosanne McNamee is a Registered Doctor of Audiology and the owner of Hearing Solutions Clinic. Her goal in opening her Ottawa practice was to bring hearing healthcare back to its roots, to offer the kind of care she felt was lacking in the area. Rather than open a clinic as a large retailer or chain, Ms. McNamee instead went for the simple approach: sound customer service provided by authentic hearing professionals, no marketing schemes, no manufacturer limitations. At Hearing Solutions Clinic you are welcomed into a clinic that is proud of its old-fashioned roots where the goal is hearing healthcare, not hearing aid sales. Hearing Solutions Clinic is large enough to offer amazing professional services and products, yet small enough to devote all the time necessary for uncompromised customized care. The Audiologist always takes the time necessary to both answer all your questions and listen to your concerns. You get top quality, integrity, and no shortcuts.

Now, over 10 years later, Hearing Solutions Clinic continues to welcome people of all ages to the clinic to help diagnose and rehabilitate hearing deficiencies. In fact, Ms. McNamee's unique and refreshing approach to hearing healthcare has been so well received that she has opened a second clinic in Manotick for both existing and new patients. "We're thrilled to reach out to patients living in the

southern and rural Ottawa region," says Ms. McNamee "Our patients continuously tell us they appreciate the time and effort we take, ensuring we meet their hearing needs. Our new clinic is a testament to the loyalty and word-of-mouth referrals we receive that's passed along from existing to new clients."

Hearing Solutions Clinic is also unique in that Ms. McNamee solely hires professionals that are regulated and hold the highest level of education in the hearing healthcare field. There are no Hearing Instrument Specialists, just devoted Audiologists qualified to service both children and adults, whether they are private pay or third party supported (WSIB, DVA, ACSD, etc). There is also the luxury of being in an independent clinic where you are able to choose from an unlimited range of the most recent products. This guarantees a hearing solution that is unique to you, your lifestyle and your hearing needs. "It would not be in my patient's best interest for the clinic to be manufacturer owned, only carry its exclusive brand, offer only a few favored manufacturers or only sell older technology at discounted prices like many larger centres do. To find the right solution, flexibility and selection is paramount," explains Ms. McNamee. By remaining independent, private, as well as locally owned and operated, Hearing Solutions Clinic has no manufacturer limitations. It also has very competitive prices because it has a smaller overhead and no investors to please.

If you believe in your right to the best, fullest and most customized service available, book your consultation with one of our Audiologists at Hearing Solutions Clinic, conveniently located at 1915 Baseline Rd in Ottawa and 5528 Ann St in Manotick. Parking is free! Home visits optional.
