 **HEARING SOLUTIONS CLINIC**
CLINIQUE DE SOLUTIONS AUDITIVES

When a patient walks into Hearing Solutions Clinic, they instantly become part of a team working together to reach one goal: to meet the patient's hearing needs.

Privately owned and operated by Doctor of Audiology Rosanne McNamee, Hearing Solutions Clinic adopts a refreshing approach to patient care. There are no crowded waiting rooms, commission staff or sales tactics. Rather, patients feel at home as they are greeted by their registered audiologist who is highly qualified and whose focus is personalized hearing healthcare, not hearing aid sales. Based on past experiences at other hearing clinics, patients are often pleasantly surprised by not only the thoroughness, but the attentiveness and inclusiveness at Hearing Solutions Clinic. They are also impressed with the selection.

"Our patients are our top priority. We will never limit their hearing device options," says Rosanne. "We remain independent so that all makes and models may be sold and serviced. We can therefore ensure that the best hearing device for that patient's individual hearing needs is selected." Consequently, patients will find a hearing aid that is right for them and at a competitive price because Hearing Solutions Clinic doesn't have the enormous overhead of larger clinics. "Hearing is complex and so are today's hearing aids," Rosanne explains. "Dealing with the most qualified health care professional, in the most independent setting, is crucial."

Book your consultation with an Audiologist at Hearing Solutions Clinic, located at 202-1915 Baseline Road, across from Home Depot, where parking is free. Call the Hearing Solutions Clinic today at 613.288.0295.
