

A Hearing Solution for You!

Keeping us connected with everything and everyone, our ability to hear is priceless. Unfortunately, one in ten of us suffer from hearing loss. If ignored, even the slightest hearing loss has significant consequences. You become disconnected from your world as loved ones become mumblers and asking to repeat becomes a nuisance. Your safety and independence is compromised. You risk misdiagnoses and diminishing cognitive abilities. Indeed, untreated or improperly treated hearing loss has a pronounced negative impact on your quality of life. Consulting the appropriate hearing healthcare provider, in the most independent setting, is crucial.

Privately owned and operated by Doctor of Audiology Rosanne McNamee, Hearing Solutions Clinic adopts a unique and refreshing approach to patient care which differs drastically with that of retail settings, larger clinics and manufacturer owned chains. When you walk into Hearing Solutions Clinic, there are no crowded waiting rooms, commission staff or sales tactics. Rather, you will feel at home as you are greeted in an environment with old fashion roots where the focus is personalized hearing healthcare, not hearing aid sales. From your very first visit, you become part of a team working together to reach one goal: to meet your hearing needs. Hearing Solutions Clinic is large enough to offer amazing professional services and products, yet small enough to devote all the time necessary for uncompromised customized care. You will get top quality, integrity, and no shortcuts.

Based on past experiences at other hearing clinics, patients are often pleasantly surprised by not only the thoroughness, attentiveness and inclusiveness at Hearing Solutions Clinic, but also the product selection. "Our patients are our top priority. We will never limit their hearing device options as others do" says Rosanne. "We remain

independent so that all makes and models may be sold and serviced." This enables Hearing Solutions Clinic to better meet your unique hearing needs, and at a competitive price because Hearing Solutions Clinic doesn't have the enormous overhead of larger clinics nor does it have investors to please.

Rosanne further distinguishes herself from the other clinics by solely hiring professionals that are regulated and hold the highest level of education in the hearing healthcare field. There are no Hearing Instrument Specialists at Hearing Solutions Clinic, only Audiologists who are diligent at keeping the clinic up-to-date in technology and practice. They are qualified to service both children and adults, whether they are private pay or third party supported (WSIB, DVA, ACSD, etc). In addition, Rosanne protects the special quality of her clinic by ensuring that all employees share the core values, beliefs and principles that created Hearing Solutions Clinic over a decade ago. Consequently, you receive the service of professionals who are not only top in their field, but who pride themselves on offering quality products and the highest standard of care.

"Hearing is complex and so are today's hearing aids," Rosanne explains. "Dealing with the most qualified health care professional, in the most independent setting, is crucial." At Hearing Solutions Clinic you will never worry whether or not you have chosen the best place to trust with your hearing needs.

So, if you believe in your right to the best, fullest and most customized service available, book your consultation with an Audiologist at Hearing Solutions Clinic. There are two convenient locations to serve you. Parking is free! Home visits optional.
